

MODEC DECON FORMULATION

MDF-100/200

Modec's MDF-100 and MDF-200 is now available in a convenient and easy-to-use spray bottles that are perfect for virtually any spray application that has to be small, lightweight and portable.

The Decontamination Formulation licensed by Modec, Inc. from Sandia National Laboratories, can be packaged for chemical decontamination purposes (MDF-100) or for biological/virucidal/fungicidal use pursuant to registration with the EPA (MDF-200).

These delivery devices are either 22 oz (650 ml) or 10 oz (295 ml). Contact Brian Starbuck, Modec Chief Chemist at 303-373-2698 or toll free 1-800-967-7887.

How it works...

Dispenser Head

Controls ingredient blending and product flow. Within the Dispenser Head there are two pumps that offer volumetric dispensing and are individually actuated in precise relationship to the positioning of the interior disc in the Dispenser Head. The total package is less than 2" wide and is 49 mm tall.

Connectors (2)

Lock onto the bottles and maintain ingredient integrity, prevent product leakage, while connecting the Dispenser Head to the product bottles.

Product trademark information proprietary to Versadial, Inc.
