

# MDF-500D

**SPECIALLY FORMULATED FOR USE IN  
HVAC SYSTEMS**

**MDF-500D has been specifically designed for Professional HVAC Maintenance and Cleaning Contractors . Produced under license from Sandia National Laboratories, MDF-500D is a patented technologies originally developed to counter chemical and biological warfare toxants.**

**REMEDIATION - As MDF-500D is a proven Cleaner, fungistat, deodorizer and mildewstat. MDF-500D is registered with the USEPA for use in HVAC systems. It provides professionals with an unmatched remediation tool. It cleans and restores surfaces and areas affected by mold and its chemical metabolites.**

**RESTORATION - MDF-500 has been shown to be an effective cleaning agent for Microbial Volatile Organic Compounds [mVOC's] and mycotoxins, chemicals by-products that have been known to be allergenic. MDF-500D mitigates conditions caused by these metabolites of mold. MDF-500D can be used in exterior applications on porous surfaces to inhibit mold the growth of mold.**

**RETARDS – MDF-500D inhibits and retards the growth of mold, mildew and fungus and can be used by professionals in schools, hospitals, homes and commercial facilities. MDF-500D is a breakthrough product based upon patented military technology.**

**Modec's Decon Formula (MDF)  
is Commercially Manufactured  
using the Formula Licensed by**

**Sandia National Laboratories**
