

MODEC AGCON

Agricultural Treatment Formula

Modec, Inc., an authorized licensee of the federal government at Sandia National Laboratories, has developed a unique acid-based formulation specifically for agricultural purposes. Accepted for use as a fertilizer by the USEPA, Modec's AgCon contains soil conditioners that promote excellent yield *and* resists microbial growth. Synergistic compounding of the formulation provides a unique system that is unaffected by excessive organic soils.

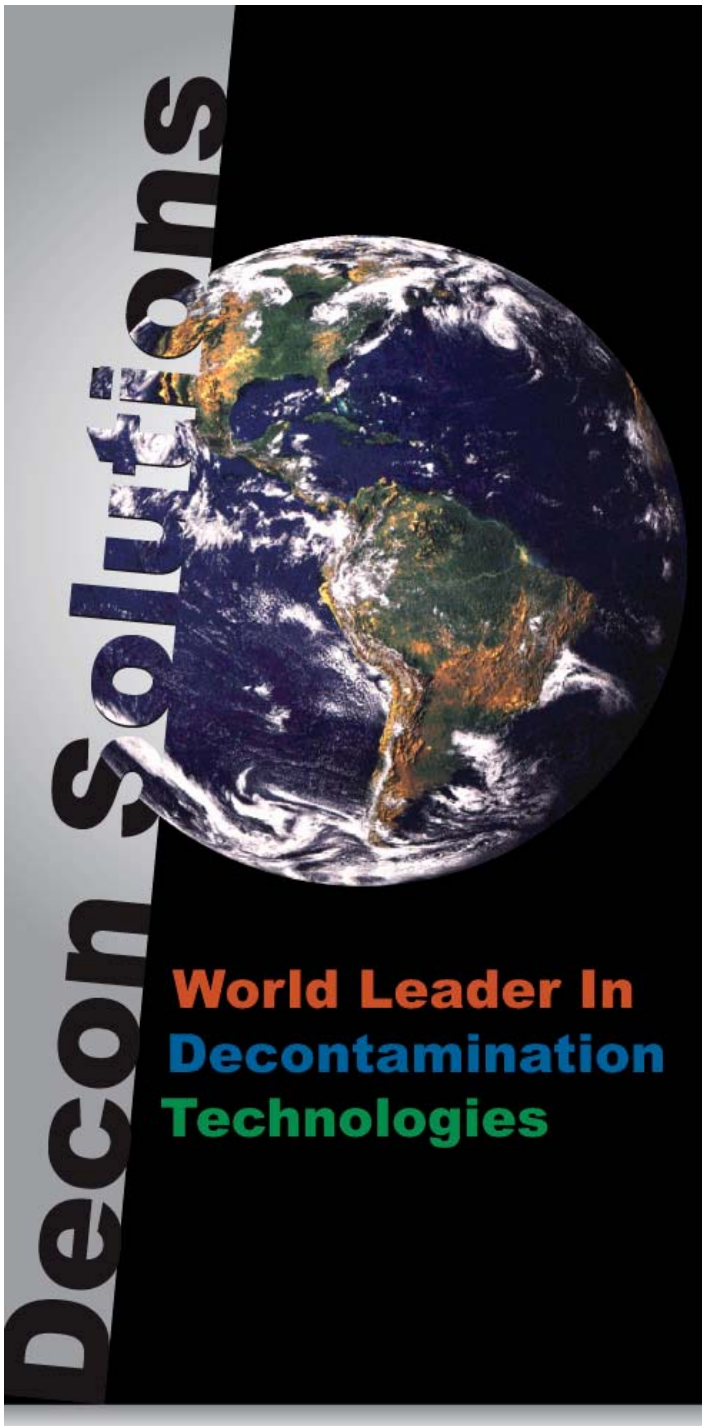

- Synergistic compound incorporates unique wetting agents for thorough penetration of agents
- Soil amendments retards the growth and action of microorganisms
- Provides superior yields
- Economical, safe and non-toxic to apply

Modec's Decon Formula (MDF) is Commercially Manufactured using the Formula Licensed by

Sandia National Laboratories
