

MDF ROOF PRO

Outdoor Surface Decontaminant and Cleaner for Roofs

Uses: Building roof surfaces often become effected and damaged by outdoor contamination, mold and mildew. Typical cleaners such as bleach can be caustic and damage many materials over time, and are ineffective against stubborn mold stains.

Applications: Can be used on roofs and exterior surfaces such as wood siding and wood decks to clean and restore surfaces.

Product Description: Developed The at Sandia National Laboratories. Highly efficacious and environmentally safe, MDF Roof Pro is a binary system that can be used to clean surfaces, remove stains and restore surfaces. The product can be brushed or sprayed onto exterior surfaces.

MDF Exterior Pro Features:

- **Incorporates unique wetting agents for thorough penetration of porous surfaces.**
- **Economical, safe and non-toxic to apply**
- **Cleans and removes contamination**
- **Requires only periodic application**
- **Proven Patented Technology**
- **Can be sprayed or brushed on.**
- **Can be used in ULV Fogging Equipment**

**Modec's Decon Formula (MDF)
is Commercially Manufactured
using the Formula Licensed by**
