

MARINE DECON

Specialty Formulation for Boats and Marine Applications

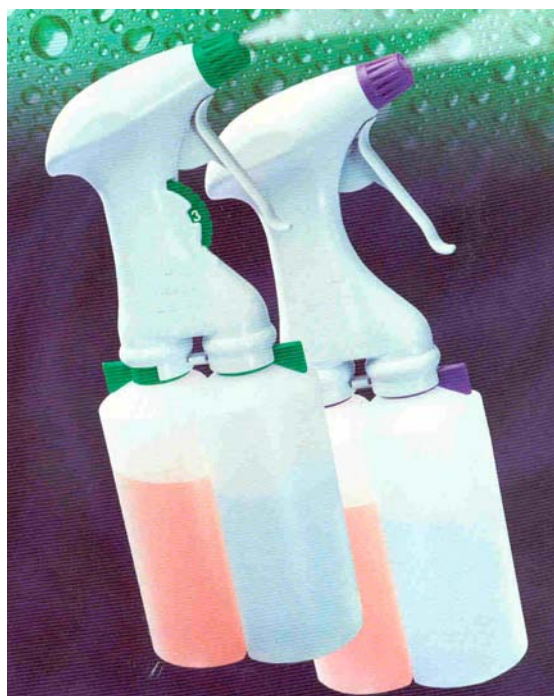

Uses: Being constantly impacted by moisture and water, boats and their components are frequently damaged and by mold and mildew. In addition, deterioration and odors are often times caused by microbial organisms. Typical cleaners such as bleach are caustic and damage many materials. Bleach loses its effectiveness almost immediately.

Applications: Can be used safely on variety of boat surfaces including exterior surfaces such as aluminum, wood siding, wood decks and rails to inhibit the growth of mold and mildew. Restores the finish of heavily damaged wood components.

Product Description: The US Government developed the underlying technology at Sandia National Laboratories. Highly efficacious and environmentally safe, Marine Decon Pro is a binary system that can be used to clean surfaces, deodorize, remove stains and prevent damage that is caused by growth from mold and mildew. The product can be brushed or sprayed onto exterior surfaces.

Marine Decon Pro Features:

- **Incorporates unique wetting agents for thorough penetration of porous surfaces.**
- **Economical, safe and non-toxic to apply**
- **Cleans and removes mold and mildew**
- **Requires only periodic application**
- **Proven Patented Technology**
- **EPA Registered FIFRA Product**
- **Can be sprayed or brushed on.**
