

Smoke Decon

DS Smoke Decon Pro Fire and Smoke Decontaminant

USE: Smoke Decon Pro has been developed to chemically neutralize the residual effects and odors created as a result of fire and smoke damage. The patented technology cleaves the molecular structure of smoke generated odors as opposed to masking the smells through perfumes or other means.

DIRECTIONS:

Use only as directed by trained applicators.

TECHNOLOGY DEVELOPMENT: In response to a national initiative, Sandia National Laboratories under the Department of Energy, patented the Sandia Decon Formulation pursuant to US Patent No. 6,566,574 B1. The Modec Decon Formulation ("MDF") Series of products are produced by Modec, Inc. under its license 00-C00872 with Sandia Corp. MDF-300 is non-toxic and environmentally safe for the effective treatment of fire and smoke damage to structures and other surfaces.

DS Smoke Decon Pro Fire and Smoke Decontaminant

PRODUCT DESCRIPTION: Smoke Decon is a safe, non-toxic neutralizing product specially designed to remediate the effects of fire and smoke on hard surfaces and structures. It is non-flammable, biodegradable and does not contain alcohol-based ingredients. This patented aqueous-based media contains unique elements that provide for oxidation and hydrolysis of the elements typically created as by-products of smoke and fire. For complete information about this product see www.deconsolutions.com.

CONTAINS: DS Smoke Decon Pro Formulation

KEEP OUT OF EYES: Do not ingest. Avoid contact with mucus membranes. Flush eyes thoroughly. Keep out of the reach of children.
